Project name and location	
Submission date	

Large Land Deal First Pass Checklist

Complete all known information and mark unavailable items as Unknown.

Project and Property

1. Where is the property? Include address, county, state, parcel numbers and approximate acreage.

2. What is the proposed technology? Select Solar PV, Solar plus BESS, Stand Alone BESS or Other. Include estimated kW or MW and, if applicable, MWh and storage duration.

3. Who owns the land, and does the project have site control? Attach ownership and any signed option, lease or purchase agreement.

4. Is a current deed or title report available? Attach the most recent copy.

5. Are there title commitments or exceptions, including mortgages, liens, easements, mineral rights, restrictions or other claims affecting the property? Attach available documents.

Utility and Grid Connection

6. What utility serves the property? Is it investor owned, municipal or a cooperative?

7. What is the proposed project classification and process: distribution interconnection, transmission interconnection, behind the meter, non export or wholesale generation?

8. Who is the utility or interconnection contact? Provide department, name, phone number and email, if known.

9. Has the utility been contacted or has an interconnection application been submitted? Provide the application or queue number and attach any response.

10. What documents, studies, deposits or other requirements has the utility identified?

11. What timeline has the utility provided? Note any delay, moratorium, backlog or indication that interconnection could take multiple years.

12. Where is the expected connection point? Identify the nearest line or substation, approximate distance, voltage if known and attach a map or screenshot.

Power Buyer

13. Who will buy or use the power: utility, data center, business, cooperative, municipality or another buyer?

14. Is there an LOI, term sheet, PPA, utility program or other written evidence of buyer interest? Attach it if available.

15. If a cooperative or municipal utility is involved, who supplies its wholesale power and has the project been confirmed as allowable?

Permitting and Site Concerns

16. What county, city or other authority will approve the project? Is large scale solar or storage allowed on the property?

17. What is the estimated permitting timeline? Note any hearing, rezoning, public meeting, moratorium, size limit or special study.

18. Are there known wetlands, flood zones, protected species, contamination, protected farmland, steep slopes, airport concerns or community opposition?

Attachments for the First Pass

☐ Address and parcel numbers	☐ Landowner and site control documents
☐ Current deed or title report	☐ Title commitment and exceptions
☐ Property boundary map or KML/KMZ	☐ Preliminary layout or site plan
☐ Utility contact information	☐ Utility requirements or response
☐ Interconnection or queue record	☐ Line or substation distance map
☐ Buyer LOI term sheet or PPA	☐ Known permit or environmental information

Project Status

Target construction start	
Target commercial operation date	
Estimated total project cost
